

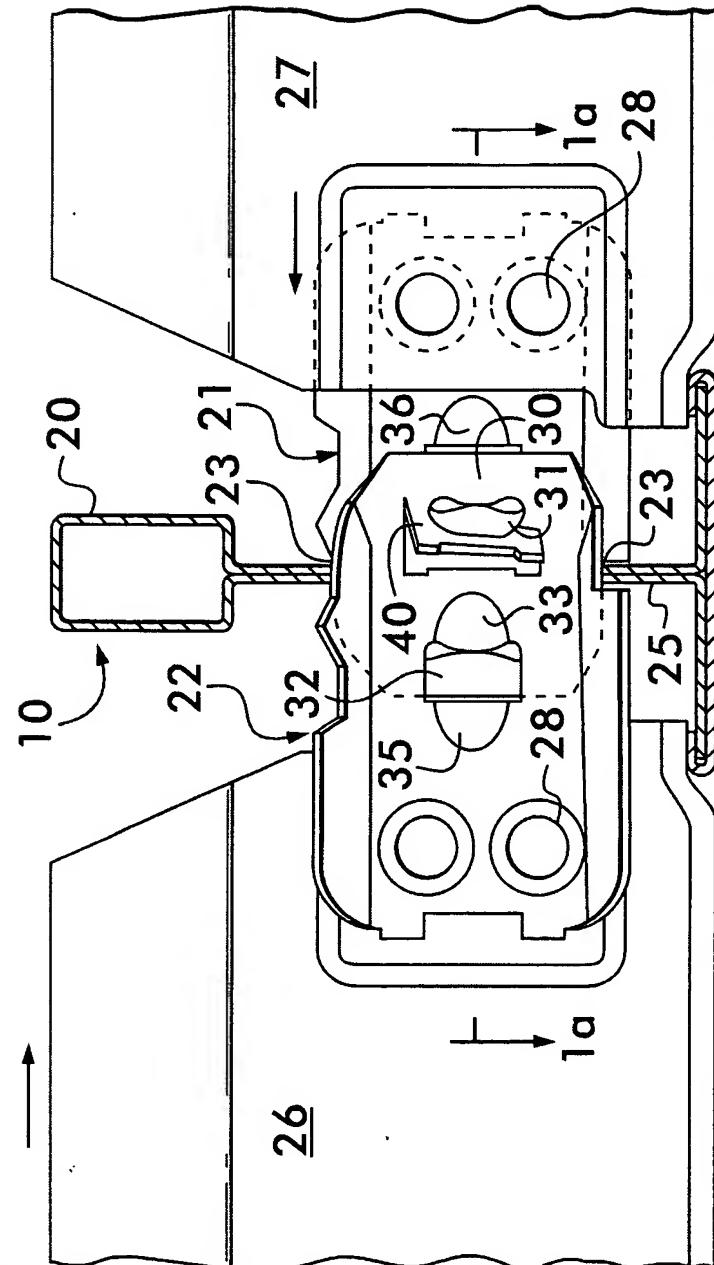

FIG. I

A cross-sectional diagram of a double-layered structure. The top layer consists of a central vertical column 20, with a horizontal band 21 at the top and a horizontal band 27 at the bottom. The bottom layer consists of a central vertical column 22, with a horizontal band 23 at the top and a horizontal band 26 at the bottom. Between the two layers, there are two horizontal bands labeled 35 and 40, which are connected to each other and to the central columns. The labels 20, 21, 22, 23, 26, 27, 35, 36, 40, and 25 are all present in the diagram.
